## HOBBIES AND INTERESTS

---

**Computer Science** I'm particularly interested in artificial intelligence and web development, as I enjoy building smart, interactive systems that solve real-world problems. I'm fascinated by how AI can automate tasks, enhance user experiences, and open new possibilities in technology. At the same time, I appreciate the creativity and logic involved in front-end and back-end web development, and I'm eager to deepen my skills in both areas.

**Football** Passionate football player with over 12 years of experience as a goalkeeper. I've played for clubs including R.U. Auderghem, R.R.C. Boitsfort, and KSAV St. Dimpna, and I currently play for ASV Geel. Football has taught me discipline, teamwork, and how to stay focused under pressure, qualities I bring to both my academic and professional life.
